LEADING IN MARINE SCIENCE AND AQUATIC RESOURCES
Malaysia’s location near the equator makes it an ideal tropical holiday destination. In Malaysia, the weather is mostly sunny and often very hot and humid, particularly in major cities. While the temperature range is usually between 25 and 35 degrees, the country’s coastal and highland areas tend to enjoy cooler weather. The country experiences two monsoon seasons: the Southwest Monsoon runs from late May to September and the Northeast Monsoon from November to March. During these periods precipitation brings some relief from the heat, with heavier rainfall usually during the latter.
Situated in Southeast Asia, Malaysia is characterised by its multi-racial composition, breathtaking natural environment, and unique mix of cultural heritage. Peninsular Malaysia, which is surrounded by Thailand, Singapore, and the island of Sumatra, is separated from East Malaysia on the island of Borneo by the South China Sea.

Malaysia's capital city is Kuala Lumpur where you'll find many contemporary attractions such as shopping malls, entertainment centres, museums, and art galleries. It is also the epicentre for high profile events such as international concerts, large scale theatre shows, and colourful festivals. Beyond Kuala Lumpur, there is a wide variety of attractions and events throughout the country ranging from the quaint and traditional to the modern and mainstream.

**Terengganu** is the land of island getaways, quaint fishing communities, and traditional handicrafts. Its capital city, Kuala Terengganu, is a thriving mini metropolis that has managed to retain the laid back feel and traditional charm of a small town, while providing the amenities and attractions expected in a large city. Those who enjoy the outdoors will also find many opportunities to enjoy nature based activities including snorkelling, diving, jungle trekking, rafting, and boating as Terengganu is home to many of the country’s most popular island holiday destinations. Here is also where you’ll find Lake Kenyir, the biggest man-made lake in Southeast Asia, which is situated in the National Park, one of the world’s oldest rainforest.
