

# The 4<sup>th</sup> Malaysian Software Engineering Conference

"Empowering Software towards the Development of Human Capital"

**16 - 17 December 2008, Terengganu Equestrian Resort (TER), Terengganu, Malaysia**

## CALL FOR PAPERS

The Malaysian Software Engineering Conference (MySEC) is the leading regional conference on software engineering that aims to bring together researchers and practitioners from the academia, industry and government to advance state-of-the-art research and practice in software engineering.

The theme of MySEC'08 is "Empowering Software towards the Development of Human Capital". It reflects the major challenges currently faced by software community to ensure software developed have the value-added characteristics that not only computerize users' tasks but also support them in nurturing and developing the human capital. For instance, nowadays there are a lot of web applications for e-learning and e-community that provide forum as the medium for knowledge sharing or communication. However without proper design, such features can be underutilized if they are not able to attract users to share their knowledge or communicate effectively online.

Thus, MySEC'08 provides a platform for collaborations among academia, researchers, and practitioners with the focus to increase the awareness that they can improve the techniques, methods and tools of software in order to develop human capital particularly in knowledge sharing. Papers presenting original work in all aspects of software engineering are invited. Submission topics include, but are not limited to:

- Aspect-orientation and feature interaction
- Computer-supported cooperative work
- Distribution and parallelism
- Embedded and real-time software
- Empirical software engineering and metrics
- Intelligent Computing
- Mobile and ubiquitous computing
- Multimedia software engineering
- Object-oriented application and technologies
- Programming languages
- Requirements engineering
- Software architecture and design
- Software components and reuse
- Software engineering education
- Software maintenance and evolution
- Software policy and ethics
- Software processes and workflows
- Software quality
- Software security, safety and reliability
- Software testing and analysis
- Software tools and development environments
- Theory and formal methods
- Miscellaneous (Computer Science)

## REGISTRATION FORM

Name: \_\_\_\_\_

Title: \_\_\_\_\_

Institution/Affiliation: \_\_\_\_\_

Address: \_\_\_\_\_

\_\_\_\_\_

Phone: \_\_\_\_\_ Fax: \_\_\_\_\_

E-mail: \_\_\_\_\_

Are you presenting a paper: Yes/No

Title of the paper: \_\_\_\_\_
